The screenshot shows the Visual Studio Code interface. The Explorer panel on the left displays a project named 'vs code progss' with several files, including 'shorthand.py'. The main editor window shows the content of 'shorthand.py', which contains the following code:

```
1 #shorthand notation
2 a=5
3 a+=5
4 print(a)
```

The Output panel at the bottom shows the execution of the script. The command executed is `python -u "c:\Users\HP\OneDrive\Desktop\vs code progss\shorthand.py"`, and the output is `10`. The status bar at the bottom indicates the file is encoded in UTF-8, uses 4 spaces for indentation, and is running Python 3.11.1 64-bit.
