

Q.9>>Write a function that takes 2 no. as input parameters and return their gcd (greatest common divisor).

```
#gcd(greatest common divisor)
a=int(input("enter 1st no:"))
b=int(input("enter 2nd no:"))
while(a!=b):
    if(a>b):
        a=a-b
    else:
        b=b-a
print("gcd:",a)
```
