

```
#python pattern
```

```
word = "Python" #word is a string
```

```
x = ""          #x is a empty string
```

```
for i in word:
```

```
    x += i      #i is added with the empty string x and so
```

```
on..
```

```
    print(x)
```
