Q.13--> Write a python prog to check whether an int no is even or odd.

```python
#odd even by function
def odd_even(num):
    if(num%2==0):
        print("the no is even")
    else:
        print("the no is odd")
#main function
num=int(input("enter a no:"))
odd_even(num)
```
